

THE SMART WAY TO CAPTURE DRONE DELIVERIES.

ParcelHoop is an innovative, self-sufficient delivery capture system designed for gardens, driveways and outdoor spaces. It ensures your parcels are safely caught – every time.

RELIABLE CAPTURE

Engineered to safely catch parcels up to 5kg.

PIVOTED NET SYSTEM

The net pivots open on impact and closes to secure the parcel.

DAMPER TECHNOLOGY

Integrated dampers absorb impact for smooth, gentle parcel capture.

BUILT TO LAST

Weather-resistant materials for all-year-round performance.

HOW PARCELHOOP WORKS

1 APPROACH

The drone approaches and lowers the parcel into the hoop.

2 IMPACT & PIVOT

On impact, the pivoted net swings open to receive the parcel.

3 DAMPED CAPTURE

Dampers absorb the impact, preventing bounce and protecting the parcel.

4 SECURE & SAFE

The net returns to its closed position, securely holding the parcel until collected.

PERFECT FOR HOMES, GARDENS & BUSINESSES

A simple, secure and sustainable solution for the future of deliveries.

SUSTAINABLE DELIVERY

Reduces missed deliveries, protects parcels and supports a greener future.

NEVER MISS
A DELIVERY
AGAIN.
